

The following instructions are guidelines to be used for the proper fit of a tuxedo. It must be remembered that these are only guidelines and that there are exceptions to every rule.

#### sleeve

Measure from the center of the collar at the back of the neck, over the shoulder, the length of the arm to one inch beyond the wrist bone.

#### waist

Measure around the waist directly over the shirt (not over slacks or coat) just above the hip bones and over the navel. Keep two fingers between the tape and the customer's body. The number of inches is the waist measurement.

#### outseam

Measure from the top of the waistline to where the pant should fall on the shoe; generally the top of the heel.

#### inseam

With pants pulled up to where the customer is comfortable, measure from pant crotch seam to where the pant should fall on the shoe; generally to top of the heel.

#### neck

Measure around the neck until the tape is comfortably snug. Record exact measurements including half sizes.

#### chest

Measure around the fullest part of the chest keeping tape up under arms and across the shoulder blades. Add two inches to this measurement to get the coat size.

Please Measure  
Across Biceps

#### coat

Coat length is determined by the sleeve measurement. Use the chart below to order the correct coat length. (Note: Coat Size is determined by the Chest measurement plus 2 inches).

	37" or longer	X-Long

For Slim  
Fit,  
Please  
Measure  
Across  
Thigh

Example: Customer's chest measures 40" and his sleeve measures 34". The coat you should order for him is a 42 Reg.
